NHS HEALTHCHECKS

NHS Healthchecks are being offered to people aged between 40 and 74 once every 5 years.

The check is to assess the risk of developing heart disease, stroke, kidney disease or diabetes. By taking early action, patients can improve their health and prevent the onset of these conditions.

The appointment will take about 30 minutes and is based on straightforward questions and measurements such as age, sex, family history, height, weight and blood pressure. There will also be a simple blood test to measure your cholesterol level.

Please contact the surgery to enquire and book in for your FREE NHS Healthcheck.
